Clinical Question:

Example: Is constraint-induced movement therapy an effective treatment for stroke patients suffering from upper limb paresis?

1. Identify the key elements of your question using the PICO format:

P = Patient/Problem → ____________________________
I = Intervention → ____________________________
C = Comparison (may not have one) → ____________________________
O = Outcome → ____________________________

2. List the main terms and alternative terms (synonyms) from your PICO that can be used for your search: (use subject headings – e.g., MeSH Terms or CINAHL Headings – when possible)

<table>
<thead>
<tr>
<th>P</th>
<th>I</th>
<th>C</th>
<th>O</th>
</tr>
</thead>
<tbody>
<tr>
<td>synonyms</td>
<td>synonyms</td>
<td>synonyms</td>
<td>synonyms</td>
</tr>
</tbody>
</table>

3. List any potential search limits – gender, age level, publication date range, language, etc.:

4. Which databases do you plan to search?

5. As you search, keep in mind Sackett's levels of evidence:

   - Systematic reviews/meta-analyses of randomized control trials (RCTs)
   - Individual RCTs with narrow confidence intervals
   - Systematic reviews of cohort studies
   - Individual cohort studies & low-quality RCTs
   - Systematic Reviews of case control studies
   - Case-controlled studies
   - Case series & poor-quality cohort & case-control
